

I am a current listener of K-love radio stations which use an FM translator. Our K-love station is a vital part of our family and serves a unique and needed service in our area. Although there may be other Christian or family radio stations this is the only one that plays continuous contemporary Christian music for my whole family. They share the message of the Bible with our friends and family and have important news info. Though other radio stations may offer one of these services none has combined to the fortitude of a national broadcast, and none can thus have the same impact. K-love is therefore in the direct interest of the public of our area as it provides vital programming reaching vast age groups with a unique genre of music for the entire family in a way that is unparalleled by local or smaller stations. PLEASE do not allow LPFM stations to interfere with this FM translator service they are an important part of my family and community we listen to this station exclusively!!
